LEADING THE WAY WITH ACTION ON SINGLE-USE PLASTICS

SINGLE-USE PLASTICS LEGISLATION EXPLAINED

On September 9, 2020, the South Australian Parliament passed the *Single-use and Other Plastic Products (Waste Avoidance) Act 2020*. This legislation is the first of its kind in Australia and a positive step towards avoiding waste.

South Australian retailers will lead the rest of the country by avoiding waste and offering sustainable alternatives to single-use plastic food service items.

WHEN?

From March 1, 2021, single-use plastic straws, cutlery and stirrers will be prohibited from sale, supply or distribution in South Australia. These single-use items can be replaced with reusable and compostable alternatives. Exemptions will apply for single-use plastic straws.

From March 1, 2022, expanded polystyrene cups, bowls, plates and clamshell containers will be prohibited from sale, supply or distribution in South Australia.

Oxo-degradable plastic products will also be prohibited from manufacture and production in the state.

Oxo-degradable plastic products contain additives that cause the plastic to break down into tiny fragments ('microplastic'), which does not completely decompose.

WHY?

Plastics play an important role in our economy and daily lives. When used in packaging, plastics help ensure food safety and reduce food waste.

But too often, the way plastics are produced, used and discarded results in a wasted resource, causing pollution, litter and harm to wildlife, including marine life. South Australians are committed to the environment and want action on single-use plastic products.

By avoiding waste and shifting to reusable or recyclable options we are ensuring the best environmental outcome for our 'clean and green' state.

WHAT?

The legislation prohibits the sale, supply or distribution of single-use plastic straws, beverage stirrers and cutlery. Single-use plastic products are designed to be used once, or for a limited number of times, often away from home, and thrown away after a brief use, usually resulting in waste.

EXEMPTIONS

Exemptions allow for the sale, supply and distribution of single-use plastic straws for people with disability or health needs. Exemptions will also apply to pre-packaged and attached products such as straws attached to juice or milk boxes.

COMPLIANCE

Compliance in South Australia will be enforced by the Environment Protection Authority.

FOR MORE INFORMATION, GO TO [REPLACETHEWASTE.SA.GOV.AU](https://replacethewaste.sa.gov.au) OR 1800 844 946

PROHIBITED

SINGLE-USE PLASTIC DRINKING STRAWS

Any straw made from, or comprising, fossil fuel derived plastic and/ or compostable plastic which is designed to be used once, or limited number of times, before being thrown away.

Exemptions will apply for people who require single-use plastic straws due to a disability or health need. Exemptions will also apply to pre-packaged and attached products such as plastic straws attached to juice or milk boxes.

Fossil fuel derived plastic include:

e.g. Polypropylene (PP), Polyvinyl Chloride (PVC)

Compostable (bioplastic) plastic includes:

e.g. Polylactic Acid (PLA).

Bioplastics are not a suitable alternative for single-use straws, cutlery and stirrers. While compostable plastic products can break down in industrial composting facilities, they can cause litter, pollution and harm to wildlife, including marine life in the same way as conventional, fossil fuel plastic products when not composted.

Plastic straws with a scoop

Regular plastic straws

Flexible plastic straws

Regular and cocktail plastic straws

Bubble tea straws

Samples of single-use plastic drinking straws, which will be prohibited, are pictured above.

FOR MORE INFORMATION, GO TO REPLACETHEWASTE.SA.GOV.AU OR 1800 844 946

SINGLE-USE PLASTIC STIRRERS

Any stirrer made from, or comprising, fossil fuel derived plastic or compostable plastic which is designed to be used once, or a limited number of times, before being thrown away.

Plastic and compostable plastic (PLA) beverage stirrers

Plastic ice cream spoons

SINGLE-USE PLASTIC CUTLERY

Any utensil that can be used to eat food. This includes spoons, forks, knives, sporks, splayds and chopsticks which are designed to be used once, or a limited number of times, before being thrown away. Exemptions will also apply to cutlery that is attached as part of a pre-packaged product e.g. a plastic spoon attached to a yoghurt tub.

REUSABLE

Does your business promote and sell reusable options? More and more products are being developed from reusable materials such as glass, silicone, bamboo, titanium, stainless steel, ceramics and robust reusable plastics. Do you stock reusable and cost-effective alternatives?

A sample of alternative reusable products is pictured

FOR MORE INFORMATION, GO TO REPLACETHEWASTE.SA.GOV.AU OR 1800 844 946

DISPOSABLE

If you are supplying disposable options ensure these are certified compostable. Speak to your supplier to find out what they stock or email Green Industries SA at sup@sa.gov.au for a list of Suppliers of Alternative Products.

Look for compostable products that do not contain plastics.

Compostable products should be placed in the green bin to enable effective composting at a commercial facility.

Alternatives include straws made from certified paper, bamboo or by-products like sugarcane (be careful as some suppliers describe PLA as sugarcane). Cutlery and stirrers can be made from wood or bamboo.

Wheat straws

Paper straws

Disposable wooden cutlery

Disposable wooden chopsticks

AVOID WASTE AND REDUCE COSTS

Businesses are being advised to reduce the cost of switching to non-plastic alternatives by reducing the quantity of the product being used. By reducing the use of unnecessary items provided to customers you will save money and avoid wasting resources.

CUTLERY

- Place takeaway cutlery out of reach of customers.
- Only provide cutlery on request.

STRAWS

- Place straws out of reach of customers, such as behind or under the counter.
- Train staff to provide straws only on request or for beverages that require straws.

STIRRERS

- For dine in, use washable, reusable drink stirrers.
- For takeaway, consider if these are necessary. If they are, only provide on request.

CRITICAL DATES

PHASE 1 ACTIONS - MARCH 1, 2021

Prohibited: Single-use plastic straws (exemptions apply), stirrers and cutlery

PHASE 2 ACTIONS - MARCH 1, 2022

Prohibited: Expanded polystyrene cups, plates, bowls and clamshell containers and oxo-degradable plastics

PHASE 3 ACTIONS - DATE TO BE DETERMINED

Additional single-use and other plastic products will be prohibited at a date to be determined

PREPARE NOW

Visit replacethewaste.sa.gov.au now to learn about the legislation and what it means for your business. Encourage your colleagues, co-workers and staff to do the same.

STEP 1: STOCKTAKE

Check your inventory of single-use plastic straws, cutlery and beverage stirrers to ensure you will be ready for the change starting in South Australia on March 1, 2021. Consider whether you need to have all or some of these types of items available to your customers, as you may be able to reduce costs.

Single-use plastic cutlery and beverage stirrers

- Stop ordering single-use plastic cutlery and beverage stirrers now.

Single-use plastic straws

- Stop ordering single-use plastic straws unless you intend to keep these for people with disability or health needs – it's your choice.
- Flexible single-use plastic straws are often used by people who need them due to disability or health needs.

FOR MORE INFORMATION, GO TO [REPLACETHEWASTE.SA.GOV.AU](https://replacethewaste.sa.gov.au) OR 1800 844 946

STEP 2: ORDER ALTERNATIVES

- Order alternatives as soon as possible.
- Email Green Industries SA at sup@sa.gov.au to request a list of Suppliers of Alternative Products. You will receive details such as:
 - Brand name, manufacturer and availability
 - Product composition including glues and coatings (where applicable)
 - Product or material specifications and claimed standards/certification
 - Whether the product is re-usable, recyclable or compostable
 - Wholesale and retail costs
 - Safety e.g. if item is unsuitable for holding certain liquids or hot foods.

The reference to a particular product or company in the list does not mean an endorsement by Green Industries SA.

STEP 3: EXCESS STOCK OPTIONS

Don't stockpile unused products for a rainy day unless you choose to retain single-use straws for people with disability or health needs. Here are some options to avoid sending single-use plastic items to landfill:

RETURN

Contact your supplier for return options. These products may still be used interstate but items should be in the original, unopened packaging.

RECYCLE

Enquire if excess stock can be recycled – this depends on the type of plastic and if it has a use. Contact these companies (fees may apply):

YCA Recycling
Wingfield, Adelaide
Phone: 1300 503 882
www.ycarecycling.com

Recycling Plastics Australia
Kilburn, Adelaide
Phone: 08 8359 1111
www.rpau.com.au/contact

REUSE

If plastic drinking straws are in the original unopened packaging these straws may be able to be donated for use by those with disability or health needs under the exemption.

FOR MORE INFORMATION, GO TO REPLACETHEWASTE.SA.GOV.AU OR 1800 844 946

STEP 4: PREPARE FOR DISPOSAL

- Correct disposal of compostable items may mean changing your waste management and recycling systems and practices, so prepare now.

STEP 5: EDUCATE YOUR STAFF

- Tell staff about the new legislation and how your business is going to avoid or replace the waste.
- Train staff to communicate the change to your customers.
- See the Talking Points at replacethewaste.sa.gov.au.

STEP 6: INFORM YOUR CUSTOMERS

- Display supplied Point of Sale materials available at replacethewaste.sa.gov.au – download and print or order printed copies free of charge.
- Help your customers to transition by communicating the change early.
- Tell customers with disability and health needs if you decide to keep single-use plastic straws for their use on request.
- See the Talking Points at replacethewaste.sa.gov.au.

Posters and other Point of Sale resources are available from replacethewaste.sa.gov.au

FOR MORE INFORMATION, GO TO [REPLACETHEWASTE.SA.GOV.AU](https://replacethewaste.sa.gov.au) OR 1800 844 946

TIPS FOR HANDLING CUSTOMER ENQUIRIES

HOW CAN WE HELP OUR STAFF EXPLAIN THE CHANGE?

Some customers may be unhappy with the changes needed to replace the waste. Changes to behaviour can take time. To help your staff:

- Display notices explaining the change.
- Place Point of Sale material at the register to remind customers and prompt them to bring reusable straws if needed.
- Remind customers the changes have been introduced by the South Australian Government and are being applied to all businesses in the state.
- Explain that the changes are helping to protect the environment by avoiding waste and reducing litter and harm to wildlife, including marine life.
- Refer customers to replacethewaste.sa.gov.au or the 1800 844 946 helpline.

Contact cards can be ordered from replacethewaste.sa.gov.au

YOUR QUESTIONS ANSWERED

CAN I USE UP STOCK I PURCHASED BEFORE MARCH 1, 2021?

You should use up all single-use plastic straws, stirrers and cutlery stock before March 1, 2021. The only exception is if you decide to provide single-use plastic straws for people with disability or health needs upon request.

HOW WILL THE LEGISLATION BE ENFORCED?

Enforcement of the legislation will be undertaken by the Environment Protection Authority under the *Environment Protection Act 1993*.

WHAT HAPPENS IF A MANUFACTURER SELLS ME A PROHIBITED ITEM WITHOUT MY KNOWLEDGE?

It's an offence to knowingly lead a business to believe that a product is not prohibited. If the business can prove that it believed on reasonable grounds that the product was not a prohibited single-use plastic product, it will not be held liable.

WHAT IF I AM UNSURE IF MY PRODUCT IS PROHIBITED?

A state government education campaign is helping business, industry and the community understand the legislation and encouraging people to avoid waste and use alternative products. You can check the descriptions of prohibited products at replacethewaste.sa.gov.au. If you are still unsure call the 1800 844 946 helpline.
